## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1, 3, 8-10 and 14 are allowed.

The indicated allowability of claim 15 is withdrawn in view of further review of the language of the claim. Inconvenience to applicant is regretted.

### ***Election/Restrictions***

Claims 12 and 13 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 4.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 15 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The passage "to disengage said catch from said recesses" (lines 9-10) has no written basis for a single catch being disengageable from both recesses.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 3677

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 15 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The passage "to disengage said catch from said recesses" (lines 9-10) is misdescriptive since a catch does not engage both recesses and it is unclear which catch applicant is referring to.
